Standard Features

Spa within a Spa - Our Island Spa is designed to let more friends and family join you without worry about overflowing water.

Patented Helix Jets - Our groundbreaking Helix jets send surges of water deep into your muscles for an active, effective massage, even through stationary jets.

Insulation - The full foam insulation between the cabinet and the shell helps keep the water at the right temperature and plumbing fixtures in place.

Cabinetry - Island Spas come with classy clear heart redwood cabinets. You may choose to upgrade to our attractive, durable PermaWood cabinet.

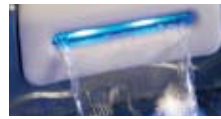

Upgrades

LED Lighting - A beautiful lighting system illuminates the appealing texture and details of your spa's interior, as well as highlighting the spa cabinet's features.

Marine-Grade Stereo Systems - With your own Island spa in your backyard, total escape is within reach every day. An Island Symphony stereo system is a perfect addition to complete your luxurious retreat. The sound system buff will appreciate the Island Symphony Stereo with MP3 adapter, CD player, sub-woofer and four speakers. If you want good sound without all the gizmos, a radio receiver with MP3 adapter, sub-woofer, and four speakers is available. An optional user-friendly LCD panel and floating remote allows you to change the track without getting out of the spa.

Pillowfall - Let the warm water flow over your neck and shoulders for the ultimate in relaxation. Optional mood lighting is available with the addition of an LED light system.

Cascading Waterfall - Listen to the soothing sound of falling water while you relax with a powerful massage. Optional mood lighting is available with the addition of an LED light system.

Footblasters - You can melt away tension and pain in a matter of minutes with this innovative design. Footblaster's single or dual powerful jets relieve tightness and relax muscles.

Green Technology Upgrades

Nature2 - Nature2 Technology uses silver minerals to destroy bacteria and algae in your spa, which means that fewer harsh chemicals are needed to keep your spa water balanced.

Ozone - The spa ozonator, with its Mazzei injector treatment system, provides crystal clear spa water with fewer harsh chemicals.

Low-Maintenance Cabinets - Our optional synthetic PermaWood and Rock spa cabinets are lighter in weight than wood and also more resilient and durable.

Ozone ProPure Mixing Chamber - Instead of injecting ozone into the spa water, as the ozonator does, the ProPure mixing chamber produces ozone in a separate chamber that isolates the spa water and ozone together. This mixing chamber more efficiently destroys bacteria that may be present in the water.

ProGuard Cover - The heavy-duty ProGuard spa cover adds insulation value to your spa and is particularly important if your spa is exposed to extremely cold weather and ice or snow.
