### Standard Features

#### DirectFlow™

- DirectFlow™ puts you in control of massage pressure with convenient water output dials built into the side of your spa.
- Our Variable Flow Control replaces the diverter valves found in traditional spas. The difference is that the Variable Flow Control does not rob water from one area to give more pressure in another area. With this system, you can soften or increase the water flow in any area of the spa, giving you remarkable massage control while retaining maximum performance.

#### Water Features

- Listen to the soothing sound of falling water while you relax with the beautiful AquaSerene.
- Warm water flowing over your neck and shoulders with the Pillowfall feature melts away tensions.

#### Ergonomic Design

- Our Resort Spa seats, of various depths, are designed for the comfort and proper support of every body.

#### Patented Helix Jets

- Our groundbreaking Helix jets send surges of water deep into your muscles for an active, effective massage, even through stationary jets. Stainless steel escutcheons around the jets give an elegant shimmer to your Platinum Elite spa.

#### PermaWood Cabinets

- PermaWood adds years of maintenance-free life to your spa. Panels are made of a durable, synthetic material that can withstand the harshest weather conditions, including snow, humidity, rain, sleet, and heat.

#### Plumbing

- Our super, high-efficiency WhisperPure system circulates all the water in your spa through our special Micron filter, optional high-yield ozonator and heater up to 100 times a day.

### Upgrades

**LED Lighting** - A beautiful lighting system illuminates the appealing texture and details of your spa's interior, as well as highlighting the spa cabinet's features.

**Marine-Grade Stereo Systems** - With your own Platinum spa in your backyard, total escape is within reach every day. A Platinum Poly Planar or Spa Tunes stereo system is a perfect addition to complete your luxurious retreat. The sound system buff will appreciate the Poly Planar with CD player, sub-woofer, floating remote, and two 360-degree rotating, pop-up speakers. The Spa Tunes stereo comes standard with watertight iPod / iPhone Dock, sub-woofer, floating remote, and two 360-degree rotating, pop-up speakers.

### Green Technology Upgrades

**Nature2** - Nature2 Technology uses silver minerals to destroy bacteria and algae in your spa, which means that fewer harsh chemicals are needed to keep your spa water balanced.

**Ozone** - The spa ozonator, with its Mazzei injector treatment system, provides crystal clear spa water with fewer harsh chemicals.

**Ozone ProPure Mixing Chamber** - Instead of injecting ozone into the spa water, as the ozonator does, the ProPure mixing chamber produces ozone in a separate chamber that isolates the spa water and ozone together. This mixing chamber more efficiently destroys bacteria that may be present in the water.

**ProGuard Cover** - The heavy-duty ProGuard spa cover adds insulation value to your spa and is particularly important if your spa is exposed to extremely cold weather and ice or snow.
